Total Quality Teacher (TQT)

Preamble: Teaching has come a long way from the original simpler version of transferring knowledge. A recent survey conducted among parents, teachers and students about the definition revealed that fifty percent of them indicated that teaching is the interpersonal influence of teachers on students. Students have changed considerably. Students in

the past considered teachers to be fountains of answers, but the students today consider themselves to be fountains of questions. Information and knowledge explosion has made the task of teachers all the more challenging. Teachers have to be coaches, guides, counselors and mentors, all rolled into one.

How can we be quality oriented teachers? The one day intervention searches for answers to this question. Total Quality Teachers have to excel through consistent performance and continuous improvement. As someone said, time has come to “read something no one else is reading, think something no one else is thinking, and do something no one else is doing.”

Objective: The participants in the two day session on ‘Total Quality Teacher’ will be able to identify the roles a teacher has to play in today’s world with breakneck speed and uncertainties beyond compare. The tips on achieving total quality in teaching will be listed out through real situation studies and experience sharing. The participants will write out a three point action plan for the next three months.

Audience: The Principal, Heads of the Departments, Faculty members and Non-Teaching Staff.

Methodology:

The participants will be exposed to Workshop, Videos, Audios, Worksheets and interaction through group discussions, activities and situation studies so as to ensure maximum participation in the sessions. Reading

material will be distributed to the participants.

SESSION FLOW
