ABOUT THE SEMINAR

COVID-19 Pandemic has been a matter of great concern for the humanity world over. Since its outbreak it has taken away lakhs of human lives, already infected more than one crore population around the world and is still spreading like wild fire terrifying the whole mankind. Not only the lives of human population are being lost, constantly threatened and people are compelled to live with great uncertainty in an atmosphere of growing insecurity, risk and fear, but also the world systems of education, health and economy have been terribly affected due to the current pandemic. The pandemic has altogether changed our way of life forcing us to forego the great cultural tradition and ethos of our society over the past many months. Our social relations have crumbled and interactions have completely ceased. On the contrary we have been dragged into social isolation and loneliness confining ourselves to four walls and thereby facing many health issues, stress and depression. The physical immobility or distancing although considered a viable means to contain the spread of infection is not without its corollaries such as unemployment, loss of income and extreme poverty encouraging social inequality, weakening social cohesion and leading to growing unrest and social discontent. This webinar is expected to explore different points of views of the esteemed experts vis-à-vis the social, economic, cultural and health issues arising out of the present pandemic in the global world.
